

Note:

1. Please make sure you complete this Report related to each meeting for your Practical Project – Iteration 1 below.
2. Once completed, convert this content to readme.md (GitHub).

Practical Project - Iteration 1

Group Meeting Report 1

Date 25/02/26

Notice of Meeting and Agenda

Time 11:36

Location Room 412

Sponsor:	Vox Hazbin, Bruce Wayne	Name of Group:	Goku
Group Lead:	Kateef (Kat, Tyler, Ethan)	Note taker:	Tyler, Kat
Attendees:	Kateef, Bruce Wayne(sponser), Vox Hazbin(sponser), Sans Hotel		
Absent:	N/A		
Please bring:	Laptop		
Agenda items:	1. Requirement planning 2. Setting up Git and GitHub		

Minutes

Agenda Item 1: Setting up Git and GitHub	Presenter: Kateef
---	--------------------------

Discussion: The first thing we must do before we start this project is to begin to set up Git and GitHub onto the devices we plan on using for our project.

Conclusions:

Enter conclusions here.

Action items	Person responsible	Deadline
Setting up GitHub to have a clear line of communication	Kat	Today (ASAP)
Testing commits to the repo so to make sure everyone has quick access and edits	All	Today (ASAP)
Enter action items here	Enter person responsible here	Today (ASAP)

In this meeting, we discussed how we were going to upload files to our project, and where we were going to keep them – github. We will be using markdown files to store extra information, such as reviews of ideas.

Date of next meeting:

04/03/26

Project charter

Practical Project - Iteration 1

Group Meeting Report 2

Notice of Meeting and Agenda

Time 9:30pm

Date: 04/03/26

Location Room 412

Sponsor:	Vox Hazbin,	Name of Group:	Goku
Group Lead:	Kateef (Kat, Tyler, Ethan)	Note taker:	Tyler, Kat
Attendees:	Kateef, Bruce Wayne(sponser), VoxHazbin (sponser) Sans Hotel		
Absent:	N/A		
Please bring:	Laptop		
Agenda items:	1. Working out communication platforms		

Minutes

Agenda Item 1: Working out how we will communicate during this project **Presenter:** Kat

Discussion:

During this project, all three of us will need to communicate both daily, and efficiently, to ensure that we get the best results during this course. We had multiple options we could use for this, such as emailing through our EIT outlook, through personal email, or even text messaging apps like snap chat.

Conclusions:

In conclusion, we decided that Discord would be the best method of communication going forward, as it's an app that all three of us have on all of our devices, it's easy to voice call and message each other at any time, and we can pin important information to channels so we can easily find it in the future. Discord also allows us to share a large variety of file types with each other, which will be very useful when we start getting into GitHub projects throughout the iterations.

Action items	Person responsible	Deadline: Today
Brainstorming about the pros and cons of different communication apps	Ethan	
Discussing our final few options, plus backup options	Tyler

Practical Project - Iteration 1

Group Meeting Report 3

Date 10/03/26

Time: 01:30pm

Notice of Meeting and Agenda

Location Room 412

Sponsor:	Vox Hazbin,	Name of Group:	Goku
Group Lead:	Kateef (Kat, Tyler, Ethan)	Note taker:	Tyler, Kat
Attendees:	Kateef, Bruce Wayne, Vox Hazbin, Sans Hotel		
Absent:	N/A		
Please bring:	Laptop		
Agenda items:	Creating personas		

Minutes

Agenda Item 1:	Creating Personas	Presenter:	Tyler
-----------------------	-------------------	-------------------	-------

Discussion:

For our project, we will need to make some personas, and we have decided that 3 personas will be a good number to start with. We have decided that it will be best if we go with a character from three different generations in order to get the best result, and a wide view of people that may be using the site.

Conclusions:

Each person in the core team will create a persona based on an age group that might use our product.
(Read page below for review)

Action items	Person responsible	Deadline
Create persona for elder audience	Tyler	15 th March 2026
Create persona for younger audience	Kat	15 th March 2026
Create persona for adult audience	Ethan	15 th March 2026

After we finished making our personas, we each decided to give each other feedback on them:

Persona 1 - Alastor Knolastname

Feedback: As a customer, he will be frustrating to deal with but it will give great insight for older generations and People what would get frustrated easily with technology wat expect it to just work

Persona 2 - Baerajgn

Feedback: I think she will be a fine customer to have, and won't pose much of an issue for our project

Persona 3 - Jimmy Jenkins jr

Feedback: Jimmy Jenkins Jr will be difficult to work with as he is a child and won't be able to properly explain what he wants that is understandable to adults. Jimmy Jenkins Jr also will not be able to comprehend adult words or topics that will be used. It is also very likely that Jimmy Jenkins Jr does not have any form of income or understanding of currency.

Practical Project - Iteration 1

Group Meeting Report 4

Date 18/03/26

Notice of Meeting and Agenda

Time 10am

Location Room 412

Sponsor:	Vox Hazbin,	Name of Group:	Goku
Group Lead:	Kateef (Kat, Tyler, Ethan)	Note taker:	Tyler, Kat
Attendees:	Kateef, Bruce Wayne, Vox Hazbin, Sans Hotel		
Absent:	N/A		
Please bring:	Laptop		
Agenda items:	Final Reflection for iteration 1		

Minutes

Agenda Item 1: Final reflection for iteration 1 of this project

Presenter: Kat, Tyler and Ethan

Discussion:

Now that we have set everything up, we are ready to start the next iteration. As a group, we will now be individually reflecting on the project, which will contain at least 150 words each

Here, we will write each of our reflections:

Tyler: I contributed the Alastor persona who is meant to represent the older customer base. He is meant to be hard to work with as I believe that the older audience would not be interested in our product very much. I have also been checking to make sure that the GitHub is working and helping when people get stuck with commands when using git in the terminal. I also helped by trying to organize times for the core team to communicate via discord without the stakeholders.

Feedback: I believe we could have better communication and time management between the core team and the stakeholders. However, we have had no problems with branching, pushing, or pulling with GitHub or the repo. Everyone understands how to use the software, and it is quite quick and seamless to use between different workspaces. When the core team gets into a discord call to talk about progress and create our product, we work very smoothly together and make a lot of progress in our work.

Kat: Setting up GitHub was surprisingly not as difficult as I thought it would be, and I can see how it will be very beneficial to a project such as this. Learning that my mac laptop has trouble with the .md format for files was a temporary issue, but now I know to ensure that all files are in the format of .markdown. I also created the 'Jimmy Jenkins Jr' persona, because I believe that it is a realistic example of an internet user. I, myself as a kid would have been unfortunately similar to Jimmy in many ways. I am happy that I have the group that I am with, I find working with both Tyler and Eef to be enjoyable and I think that it will go well for future iterations, especially now that we have a decent app set up for communication – we now just need to figure out how to best use it to our advantage.

Ethan

The personas help with project. The time management is not great. The GitHub is hard to set up and work this but it
nists to see what sawon went on and the meeting amidst is going good of giving taste to work on it need to be work on and
to rest - crent on est aver prosat
